

Channels360 Revenue Manager **Funding the Moments that Matter**

Maximize Reimbursement. Prove Value. Sustain Your Mission.

The transition to value-based care (VBC) means social care networks (SCNs) and Community Information Exchanges (CIEs) are now critical partners in the continuum of health. However, complex payer contracts for social determinants of health (SDoH) services often lead to billing delays and revenue leakage.

Why It Matters

Channels360 Revenue Manager is the unified, intelligent solution designed specifically to manage the unique financial complexities of integrated social and clinical services, ensuring you get paid accurately and on time for the vital work you perform.

Reduce Administrative Burden	Manage contract execution and automate repetitive billing tasks
Accelerate Revenue	Improve cash flow and reduce days in accounts receivable
Ensure Compliance	Stay audit-ready under federal, state, and waiver-based requirements
Empower Your Network	Enable equitable reimbursement for every service delivered

Key Functionality

	Challenge	Value
Dynamic Fee Schedule Management	Complex & Evolving Rates Managing hundreds of service codes, rates, and modifiers specific to each payer or contract.	Precision Pricing Manage multi-layered fee schedules and apply the correct pricing, coding and required modifiers.
Flexible Charge Capture	Siloed Service Documentation Staff are documenting non-traditional services across multiple forms and platforms, making billing an afterthought.	Automated Service-to-Claim Mapping Capture billable units directly from service completion data within the Channels360 platform.
Intelligent Claim Submission	High Denial Rates Social service claims often lack the context required by health payers, leading to high rejection rates and costly rework.	Fast, Clean Claims Automatically generate payer-compliant EDI claims (837/835) and invoices.
End-to-End Reconciliation & Analytics	Lack of Financial Visibility Tracking revenue across multiple funders (grants, contracts, VBC payments) and reconciling payments back to individual CBOs is time-consuming and opaque.	Transparent Financial Control Automate payment posting and reconciliation and instantly calculate and reconcile payments owed to partner CBOs for full network transparency.

Built for Whole-Person Care

Revenue Manager is part of the **Channels360 Solution** and integrates seamlessly with **Channels360 Coordinator** and the **Channels360 Integration Platform** - connecting social, clinical, and financial data across the care continuum.
