

## Professional Services to Help You Plan Smart, Launch Strong, and Stay Secure.

Ready Computing delivers expert integration, modern infrastructure, and proactive managed services built for today's complex, interconnected systems. **Backed by real-world operational experience**, we guide your strategy, implement resilient solutions, and keep mission-critical environments running smoothly so you can focus on outcomes, not operations.

### ADVISE

#### Consulting & Architecture Services

**Strategy, program design, architecture, readiness**

Working side by side with your team, we take the time to understand your goals, evaluate your environment, and map out a practical path forward. By closely assessing architecture, security, and day-to-day operations, the right strategy and technologies are identified to reduce risk and build a strong foundation for long-term success.

### ASSEMBLE

#### Implementation & Integration Services

**Configuration, integration, go live, production readiness**

Designed and delivered with precision and speed, secure, scalable solutions bring systems together, modernize infrastructure, and ensure everything works seamlessly. Every detail is managed from configuration through go-live, resulting in stable, production-ready environments that perform reliably from day one.

### ASSURE

#### Operations, Monitoring, & Optimization

**Operations, security, monitoring, compliance, optimization**

Proactive monitoring, maintenance, and 24x7 operational support keep systems running at peak performance while protecting uptime and strengthening security. With continuous oversight and rapid response, issues are addressed before they affect users, ensuring your environment stays reliable, resilient, and always on.

#### Credentialed and Certified

Credentials and certifications reflect Ready Computing's deep commitment to security, quality, and operational excellence.

From achieving **HITRUST Alliance r2 certification** to maintaining **Google Cloud-certified expertise** and recognition as an **InterSystems Corporation Elite Partner**, our team meets the highest standards for performance and reliability.

Aligned with **International Organization for Standardization best practices** and **U.S. Department of Health and Human Services HIPAA requirements**, these credentials aren't just badges, they demonstrate our ongoing investment in protecting data, reducing risk, and delivering trusted solutions our clients can depend on.
